

## Automatic spray robot

*Time saving sprayer.*

The automatic Spray Robot is very friendly in use. The software has been developed to be very user-friendly. Thanks to our close relationship with our supplier, we can also deliver custom solutions. This Spray Robot is guaranteed for safety, robustness and durability. The Spray Robot is designed for automatic spraying of crops. The settings are easily adjustable with the large LCD screen. In total, 9 different spray programs can be pre-set. The advantage is that you do not need to change the settings when for example you have different lengths of rows. With the Spray Robot, different types of spray booms, hoses and other accessories can be delivered.

### Advantages

- Very high driving speed
- Simple controls
- Multiple languages possible
